1. Connect systems, pathophysiology, concepts and disease processes linking classroom learning with NCLEX® standards.
2. Prioritize care by mastering system specific assessments and interventions to achieve desired outcomes.
3. Trend potential complications by managing care to prevent “RISKS” to clients.
4. Move information from short-term memory, comprehension and recall of information to long-term memory with application and analysis of information.
5. Practice proven decision-making (traditional test taking) strategies to transform learning into success on tests, in clinical practice, and NCLEX®.
6. Use strategies to assist in studying the book “The Medical Surgical Nursing Concepts Made Insanely Easy”!
7. Organize, apply nursing care, and link to NCLEX® standards.
8. Demonstrate and practice the “Prioritizing Algorithm” to assisting in perfecting this skill prior to NCLEX®.
9. Evaluate newly learned concepts and clinical decision-making skills by practicing and discussing exam items throughout the program.
10. Reviewing nursing information by using memory techniques to assist in remembering volumes of information.
