

RN REFRESHER COURSE

100% ONLINE | FACULTY LED

APPROVED BY THE FOLLOWING STATES:*

California Board of Registered Nursing

Connecticut Board of Examiners for Nursing

Kentucky Board of Nursing

Ohio Board of Nursing

Hawaii Board of Nursing

Rhode Island Board of Nursing

**Additional states pending. Contact CLN for more information.*

The RN Refresher Course is designed for inactive nurses who wish to return to staff level positions on general medical-surgical units of hospitals, long-term care facilities, home care or other health care agencies after being away from practice for three to five years or more.

- Faculty-led Course delivered by exemplar nurse educators from the Connecticut League for Nursing to support your re-entry into practice
- Over 500 Nurses have completed the Course over the past 15 years
- 100% pass rate for the NCLEX-RN exam for those nurses required by their State Boards of Nursing to re-take this exam
- Four Interactive Modules:
 - Theory- Two modules utilizing case studies, current articles and group work to compliment the nursing curriculum- two assignments per week
 - Clinical- Two modules utilizing the Virtual Clinical Excursions published by Elsevier
- Flexibility to access this web-based Course- anywhere and anytime- to fit the weekly assignments into your busy schedule

COURSE ELIGIBILITY

Current licensure as a Registered Nurse (RN) -OR-

If you do not have a current RN license, and have not actively practiced for three to five years, you should contact the Licensure Board in the state in which you wish to re-enter practice to determine the criteria and process for re-licensure before enrolling in this course.

This Continuing Nursing Education activity was approved by the Northeast Multi-State Division, an Accredited Approver by the American Nurses Credentialing Center's Commission on Accreditation.

RN REFRESHER COURSE

100% ONLINE | FACULTY LED

MODULE DESCRIPTIONS

MODULE ONE (NUR041) - (THEORY)

This module addresses basic concepts and skills applicable in the care of patients experiencing a variety of health care problems. Concepts explored include the nature of the health care delivery system; infection control; application of the nursing process in nursing practice and patient education; nursing care of older adults; legal and ethical issues in health care; nursing care of the patient experiencing surgery; nursing care for patients with fluid/electrolyte and nutritional imbalances; nursing care for patients experiencing pain; nursing care for patients with cancer. (Contact Hours: 30)

MODULE TWO (NUR042) - (CLINICAL)

In this module, students apply concepts reviewed in module one and use decision making and critical thinking skills in caring for patients in a virtual hospital setting. The virtual hospital has realistic architecture and access to patient rooms, a nurse's station and a medication room. Students work with multiple complex patient simulations and also learn to access information resources (including an electronic health record) that are essential for high quality patient care. The clinical experiences of this module focus on cultural aspects of care; fluid balance; electrolyte imbalances; pain; perioperative care; blood transfusions; cancer; and end-of-life care. (Prerequisite: NUR041; Contact Hours: 15)

MODULE THREE (NUR043) - (THEORY)

This module addresses selected health problems affecting the respiratory, cardiac, metabolic, renal, immunologic, gastrointestinal, neurological and musculoskeletal systems for which there have been recent therapeutic advances. In each instance, the physiological and psychosocial aspects of the problem are explored, and the contemporary medical/surgical, pharmacological, and nursing regimens are described. (Prerequisites: NUR041; NUR042 Contact Hours: 30)

MODULE FOUR (NUR044) - (CLINICAL)

In this module, students apply concepts reviewed in module three and use decision making and critical thinking skills in caring for patients in a virtual hospital setting. The virtual hospital has realistic architecture and access to patient rooms, a nurse's station and a medication room. Students work with multiple complex patient simulations and also learn to access information resources (including an electronic health record) that are essential for high quality patient care. The clinical experiences of this module focus on care of patients with asthma; emphysema and pneumonia; pulmonary embolism; acid-base balance; atrial fibrillation; hypertension; diabetes; intestinal obstruction and colorectal cancer; and total knee replacement. (Prerequisites: NUR041, NUR042, NUR043; Contact Hours: 15)

REGISTRATION INFORMATION
